CMC Hosts Makita Day

Capitol Materials Coastal sponsored its first Makita Day on December 12 at our Savannah yard, featuring the lowest prices of the year on the best tools. Attendance was good, but in this busy end-of-the-year-season, many customers were working to wrap up this year's business and were unable to join us.

Because many of our customers were not able to attend and take advantage of the great deals on Makita tools, we have extended show day pricing into January - while supplies last. The sale will end when the stock we ordered for the event is depleted, so be sure to stop by our Savannah showroom soon!

Product Spotlight: Armstrong Sustain Ceiling Systems

Armstrong is addressing the trend towards green building and higher sustainability standards with its line of Sustain Ceiling Systems.

Sustain components are designed and manufactured to address four primary needs: design with healthful materials, acoustical performance, high light reflectivity, and design flexibility. Sustain's green building credentials are impressive:

- Contributes to LEED V4 (including new Materials and Resources credits)
- Has Health Product Declarations (HPDs) listing product material components
- Has Environmental Product Declarations (EPDs) assessing the impact of the products
- Is free of Red List chemicals per Living Building Challenge 3.0 (including no added formaldehyde)
- Has Declare labels - easy reference "nutrition labels"
- Meets California Department of Public Health (CDPH) low emissions standards
- Contributes to Living Building Challenge
- Contributes to WELL Building Standard

Armstrong offers over 350 different panel selections in the Sustain line, so there are panels appropriate for almost any design. You can [read more about Sustain Ceiling Systems on Armstrong's website](#), or visit your closest Capitol Materials Coastal to take a look in person. We stock the full Armstrong Ceilings line.

Product Spotlight: Ruco Concrete Surfacers

Ruco Concrete Surfacers is one of the many [Ruco interior finishing products](#) Capitol Materials Coastal has in stock. This ready-mixed, non-asbestos formulation for levelling interior concrete surfaces offers

a number of advantages:

- Provides superior bond to concrete ceilings or other surfaces
- Requires no additional bonding agent
- Resists shrinkage and cracking - ideal for heavy fill applications
- Resists mold
- Certified Greenguard Gold for low VOC emissions

Ruco Concrete Surfer is available in a 4.5 gallon pail or 3.5 gallon box. Capitol Materials Coastal stocks a full line of interior finishing compounds, tools, and accessories. Consult the product specialists at your nearest yard for the best product for your application - we're always happy to help with expert advice!

Product Spotlight: Liquid Nails Drywall Glue

Capitol Materials Coastal recently added Liquid Nails adhesives to the line of products we carry. [Liquid Nails manufactures construction adhesives for a variety of applications.](#)

Liquid Nails Drywall Glue is a specially formulated latex-based adhesive for interior drywall construction. It reduces the need for fasteners by up to 50% and is recommended for bonding drywall to:

- Galvanized steel
- Wood
- Foam
- Drywall
- Expanded insulation panels

In addition to reducing the number of needed fasteners, Liquid Nails Drywall Glue also helps minimize nail pops and provides a reduction in sound transmission. The adhesive grabs fast, helps to speed up drywall installation, and cleans up easily with water before it cures. Once cured, it is waterproof. Liquid Nails Drywall Glue is Greenguard Gold certified for low VOC emissions, so it is appropriate for use in LEED and other green and sustainable building construction.

You can check out the full line of Liquid Nails construction adhesives at your nearest Capitol Materials Coastal, or [consult with one of our product specialists](#) for the best product for your application.

Regional News: TCL Plans Lowcountry Culinary Arts Institute and Interpretive Center

The Technical College of the Lowcountry plans to open a new Lowcountry Culinary Arts Institute and Interpretive Center in 2020 in Bluffton at Buckwalter Place. Construction is scheduled to start in January of next year.

The 26,000-square-foot Institute will cost about \$11.2 million and have the capacity for 300 students. Associate degrees and certificates will be offered. The Culinary Arts Interpretive Center will have visual displays of Lowcountry agriculture and farming, artifacts such as kitchen utensils and farming tools, and even cookbooks.

"The Center will be similar to a museum that educates, connects and preserves the unique culinary history of the Lowcountry," said Mary Lee Carns, Executive Director for Institutional Advancement at TCL. "The center is going to set us apart not only in the region, but it will set us

apart nationally."

Carns said that the Institute will help to prepare citizens in the local area to take advantage of an anticipated 5,000 new food service jobs in the area over the next 10 years, a third of which will require culinary training.
