VISIT YOUR NEAREST CAPITOL COASTAL LOCATION OR CMISAV.COM

CMISAV.COM

CMC's monthly specials allow you to save on a different product every month. For December, we have **Porter Cable's 7800 Drywall Sander** at a value too great to advertise!

The 7800 Drywall Sander from Porter Cable includes the sander, a sanding pad, a 13' static-dissipating 1-1/4" vacuum hose, and a hook and loop straps for mounting the power cord to the vacuum hose. The 7800 also includes these features:

- A variable-speed dial, with settings from 1,400-2,000 RPM
- A brush-type skirt surrounding the sanding pad, to prevent gouging of wall joints and aid in dust collection
- The motor is located on opposite end of handle from the sanding head, improving balance and control
- A built-in dust collection hose
- The vacuum hose is 13' long so that large areas can be sanded in one set up
- The articulating sanding head allows user to sand a wide area without changing positions

The 7800 Drywall Sander combines these features into a package weighing less than nine pounds for easy handling and reduced fatigue. If you need a new drywall sander, be sure to stop by your nearest Capitol Materials Coastal to check out the Porter Cable 7800 Drywall Sander at

this amazing low price!

Hurry, because this offer is only good through the month of December!

Product Spotlight: STI Firestop

Capitol Materials Coastal recently began stocking STI Firestop products, in keeping with our commitment to offer customers innovative, time- and labor-saving products of the highest quality.

STI Firestop specializes in developing and manufacturing simple, foolproof solutions to complex firestopping problems. Unlike the multi-step and -material procedure necessary for achieving code-specified fire ratings using traditional construction materials and methods, STI Firestop products are engineered to install quickly and easily, and designed to prevent compromise of firestopping efficacy through incorrect or faulty installation.

In addition to producing innovative and effective firestopping solutions for building construction, STI Firestop offers Firestop Instructional Training, both through its online Firestop University, and in half-day and one-and-a-half-day training courses.

[Visit STI Firestop's firestop training page for more information](#) about training options and resources. For information about STI Firestop products, consult the product specialists at your nearest Capitol Materials Coastal location. We stock the full STI Firestop line.

CMC's First-Ever Thanksgiving Luncheon a Success

Thank you to all Capitol Materials Coastal customers who joined us at our Savannah yard on November 16 for our first Thanksgiving Luncheon! The crowd of around 150 shared food and company and donated almost 200 toys and \$58 to Toys for Tots.

For those who would like to donate to the toy drive but were unable to join us for lunch, we will be continuing to accept toys and donations through December 20 for Toys for Tots. You can make a donation at any CMC yard.

If you missed the lunch this year, please make a mental note to be sure to join us next year! This first Thanksgiving luncheon was so much fun that we plan on making it an annual event!

Product Spotlight: RUCO Lightweight Platinum Ready Mixed Joint Compound

Ruco manufactures a finishing compound for every need and application. Their Lightweight Platinum Ready Mixed product has several advantages:

- Low dust - up to 60% less airborne dust and no premature sandpaper clogging
- Low shrinkage - up to 50% less shrinkage than conventional joint compound
- Better workability
- Consistent quality from batch to batch
- Lighter weight - up to 45% lighter than conventional joint compound

Capitol Materials Coastal carries the full line of Ruco joint and finishing compounds along with a [full selection of finishing tools and accessories](#). Consult one of our product specialists about the best materials and tools for your application.

Safety: Falls Remain Primary Construction Hazard

In a recent article, ConstructConnect compiled the Top 10 Frequently Cited OSHA Standards for Construction in fiscal year 2017. Over half of the top 10 are related to fall protection or working at height on scaffolds, lifts, and ladders. More disturbingly, the top 10 cited safety violations from the most recent year were the top 10 in 2016 as well, suggesting that the industry is making little progress in addressing them.

The Top 10 Frequently Cited OSHA Standards for Construction and the number of citations issued for each are as follows:

1. Failure to provide/use fall protection gear, 5,378 citations
2. Failure to meet general requirements for scaffolds, 2,644 citations
3. Unsafe ladders or ladder use, 1,989 citations
4. Inadequate fall protection training, 1,353 citations
5. Failure to use adequate eye and face protection gear, 1,125 citations
6. Failure to use adequate head protection, 700 citations
7. Failure to properly communicate dangers of toxic and hazardous substances, 688 citations
8. Improper or unsafe use of aerial lifts, 629 citations
9. Failure to adhere to general safety and health provisions, 603 citations
10. Failure to observe fall protection systems criteria and practices, 556 citations

You can [read the full article on ConstructConnect](#).

What's most striking about the list is how easy it is to avoid each of the cited violations. Nine of the top ten cited violations can be eliminated with the proper equipment and training.

For OSHA-compliant fall protection gear and training in its proper use, visit your nearest Capitol Materials Coastal location. We carry a [full line of safety equipment](#) and our product specialists are trained in the proper use of all safety gear.
